

RECEPTOR TYPE

Free nerve endings	Description: V
Merkel's corpuscles	C - slow, unmyelinated all c.
Palmarian corpuscles	Aδ - fast, myelinated says
Merkel's discs	Large, myelinated delta
	Adapt quickly
	Large, myelinated delta
	Fibers
	Ligament
	Fibers, adapt slow

PERIPHERAL NERVE
Epineurium: o connect (Fascicles & BVS)

How good is your English?

- Many people feel the harder words are the longer ones: effervescent, uninhabitable, disenfranchisement.
- However, in my opinion the little ones are trickier! Big words usually mean specific, whereas small words have many meanings.
- To show my point, all of these slides show three pictures. Each of the pictures represents ONE word.
- See if you can figure out what the pictures have in common.

Signposts

- because
- as a result
- therefore
- due to
- since
- which means

Summary: Cause and effect

That shows how one event or idea made another one happen. A writer might choose to use this if they are trying to show the relationship between events or ideas.

CUES

Written soon after class

- Bullet Points
- Listed in a chart
- Paraphrase
- Leave space between thoughts

CORNELL NOTE-TAKING METHOD

SUMMARY

Written after class. Brief summary based on the main points in the notes on this page. Used to tie into later.

I WANT

cd capillary endothelial

of Note to School

Practical vs. Scientific Knowledge

- Special knowledge asks questions to people by observation.
- Ex: "The corrupting actor-apprenticeship, his social and HI know is referred as "relicd" or "practical knowledge." (Schutz, 1962).
- In Psychology, psychologists does scientifics by gathering data, while Sociology studies behaviors of people around us.

Sociology

Psychology

- ex. Sociology: "Studies human behavior by groups of people doing scientific studies."
- Psychology: "Studying the human mind."
