### Peripheral Nerve

- Epineurium: a connective tissue that surrounds (fascicles & BVS)
- Perineurium: permselectivity barrier
  - surrounds a fascicle of N fibers.
  - Must be rejoined in microsurgery for limb reattachment
- Endoneurium

## Sociology and Doing the Real

- Sociology is all about studying the individuals around you.
- Ex. Harrison haggle w/ customers over good deals and bad.
- In sociology it happens everyday.
- Ex. families, reality shows, teachers.
- In our society today everyone is different. Sometimes people aren't caring behavior in public.

- Practical vs. Scientific Knowledge
- Social analysts ask questions getting responses.
- Ex. "The everyday actor approaches the world w/ what is referred as "real practical knowledge" (Schutz, 1964).
- In psychology, psychologists conduct studies by gathering data while so the behaviors of people around you.

Skill or Standard for focus / Objective: I can determine and explain how an author uses to cause and effect.

Structure refers to the way a writer creates a text.

A cause is a thing that makes something else happen.

An effect is a thing that happens because of something else.

Example: I overslept so I missed the bus.

Signal words

- which means

cause and effect

Multiple causes can have only one effect.

A writer might use cause and effect to explain how or why historical or scientific events happened.

### How good is your English?

- Many people feel the harder words are the longer ones: effervescent, uninhabitable, disenfranchisement.
- However, in my opinion the little ones are trickier! Big words usually very specific, whereas small words have many meanings.
- To show my point, all of these slides show three pictures. Each of the pictures represents ONE word.
- See if you can figure out what the pictures have in common.

effect is a type of text that idea made another one. This is happening to an event.
